

Castrol Hysol XF

High performance, premium quality chlorine free soluble cutting fluid

- Suitable for machining steel, aluminium and titanium alloys
- Exceptional tool-life and surface finish on steel and stainless steel
- Inherently low foam
- Long bath life
- Reduced need for maintenance

£144.95

Castrol CareCut ES2

Chlorine and heavy metal free neat cutting and grinding oil, based on advanced biodegradable ester technology

- Multi-metal machining provides opportunity for product consolidation
- Low oil mist and foam characteristics
- Excellent flushing and lubrication properties
- Good filtering characteristics and high oxidation stability
- Chlorine, mineral oil and heavy metal free formulation to help fulfil local legislation, waste treatment and environmental requirements
- High flashpoint, low odour, light colour and low mist qualities

Castrol Hysol T15

Premium quality, chlorine free, general purpose semi-synthetic cutting fluid

- Suitable for cast iron and light steel applications
- Chlorine and nitrite free to help fulfil local legislation, waste treatment and environmental requirements
- Resists fungal and bacterial attack to extend fluid life and reduce maintenance and machine downtime
- Low foam in recommended water conditions
- Good anti-corrosion properties to protect machine tools and parts
- Advanced lubricity compounds ensure improved tool life and part quality
- Excellent wetting properties reduce coolant drag out and deliver clean machine tools and components

Castrol Optigear BM 320

Solid-free high performance gear oils for long-term or life-term lubrication

- Extraordinary load bearing capacity
- Reduction of the coefficient of friction and temperature
- Improvement of the surface quality, smoothing of existing surface damage
- Excellent corrosion protection
- Maximum operational reliability
- Extended service life of gears

£159.95

Castrol Safecoat DW 30X

Premium quality low odour, aromatic free, solvent deposited corrosion preventive with excellent dewatering properties

- Low odour solvent with aromatic content less than 50 ppm
- Free from heavy metals, such as Barium
- Excellent water displacing and penetrating properties
- Thin film does not interfere with air gauging equipment.
- Flash point 60°C
